Arno Travertine Cylinder Pendant Light

Installation Guide

In the box

1 x travertine pendant with lampholder · 1 x dark wood ceiling canopy with mounting bracket · 180 cm brown fabric cable · screws and wall plugs

You will need

Drill, screwdriver, pencil and stepladder. One globe, sold separately: G9 for the Slim, SES (E14) for the Short (5 W warm white LED, 2700 to 3000K, recommended). Hang about 75 cm above a bench or table.

Important safety information

- This light must be installed by a licensed electrician, in line with AS/NZS 3000 (Wiring Rules) and local regulations.
- Turn the power off at the switchboard before installing, cleaning or servicing the light.
- Use screws and wall plugs suited to your wall (plasterboard, timber or masonry).
- Natural travertine is fragile: unpack and handle the pendant with care.
- Use an LED globe and do not exceed the maximum wattage shown on the lampholder.

Step by step

1. **Fix the mounting bracket**
   Separate the canopy from its bracket. Mark the holes and fix the bracket firmly to the ceiling, into a joist or with suitable plasterboard anchors.
2. **Set the drop**
   Loosen the cable grip at the canopy, set the drop you want, up to 180 cm, and tighten the grip. Your electrician can trim any extra cable.
3. **Connect the wiring**
   With the power OFF, connect the cable to the supply: Active to L, Neutral to N, and Earth to the earth terminal if one is fitted.
4. **Fit the canopy**
   Push the canopy up over the bracket, tuck the wires neatly inside and tighten the screws until it sits flush with the ceiling.
5. **Fit the globe**
   Slim: push in a G9 globe. Short: screw in an SES (E14) globe. Fit it gently, without force.
6. **Test**
   Restore the power at the switchboard and switch on the light.

Care and cleaning

Turn the light off and let it cool. Dust the stone and wood with a soft, dry cloth. Do not use water, chemical solvents or abrasive cleaners on the travertine.
