Aria Wave LED Wall Light

Installation Guide

In the box

1 x light body with integrated LED · 1 x mounting bracket · screws and wall plugs · wire connector

You will need

Drill, screwdriver, pencil and spirit level. No globe needed: the LED is built in. Suggested height: centre about 120 to 150 cm from the floor beside a bed, 150 to 170 cm in a living room or hallway.

Important safety information

- This light must be installed by a licensed electrician, in line with AS/NZS 3000 (Wiring Rules) and local regulations.
- Turn the power off at the switchboard before installing, cleaning or servicing the light.
- Use screws and wall plugs suited to your wall (plasterboard, timber or masonry).
- Indoor use in dry areas only.
- Dimmable version: use a compatible LED wall dimmer, fitted by your electrician.

Step by step

1. **Remove the mounting bracket**
   Undo the screws on the back of the light and lift off the metal mounting bracket. Keep the screws.
2. **Mark and drill**
   Hold the bracket against the wall, check it is straight with a spirit level and mark the holes. Check for hidden pipes or cables, then drill at the marks.
3. **Fix the bracket**
   Push the wall plugs into the holes and screw the bracket firmly to the wall, with the supply cable coming through the centre.
4. **Connect the wiring**
   With the power OFF, connect the light using the connector supplied: Active to L, Neutral to N, and Earth to the earth terminal if one is fitted. Tuck the wires neatly behind the backplate.
5. **Fit the light**
   Place the light over the bracket and tighten the side screws until it sits firmly against the wall.
6. **Test**
   Restore the power at the switchboard and switch on the light.

Care and cleaning

Turn the light off and let it cool. Wipe the frame and silicone diffuser with a soft, dry cloth. Do not use water, solvents or abrasive cleaners.

Need help?

Email hello@aussielights.com with your order number and a photo. Your light is covered by our 2-year warranty and 30-day returns.
