Clara Ribbed Glass Pendant Light

Installation Guide

In the box

1 x ribbed glass shade with brass-tone lampholder · 1 x ceiling canopy (12 cm) with mounting bracket · suspension · fixing hardware

You will need

Drill, screwdriver, pencil and stepladder. One ES (E27) globe, sold separately (warm white LED, 2700 to 3000K, recommended). Hang the shade about 75 cm above a table or bench (70 to 80 cm over an island).

Important safety information

- This light must be installed by a licensed electrician, in line with AS/NZS 3000 (Wiring Rules) and local regulations.
- Turn the power off at the switchboard before installing, cleaning or servicing the light.
- Use screws and wall plugs suited to your wall (plasterboard, timber or masonry).
- Glass is fragile: unpack and handle the shade with care.

Step by step

1. **Fix the mounting bracket**
   Separate the canopy from its bracket. Mark the holes and fix the bracket firmly to the ceiling, into a joist or with suitable plasterboard anchors.
2. **Set the drop**
   Set the suspension to the drop you want before connecting. Your electrician can shorten any extra length.
3. **Connect the wiring**
   With the power OFF, connect the pendant to the supply: Active to L, Neutral to N, and Earth to the earth terminal if one is fitted.
4. **Fit the canopy**
   Push the canopy up over the bracket, tuck the wires neatly inside and secure it so it sits flush with the ceiling.
5. **Fit the globe**
   Screw an ES (E27) globe into the lampholder inside the shade, gently and without force.
6. **Test**
   Restore the power at the switchboard and switch on the light.

Care and cleaning

Switch off the power and let the light cool. Wipe gently with a soft, dry cloth. Avoid abrasive cleaners, and never wet the lampholder or cable.
