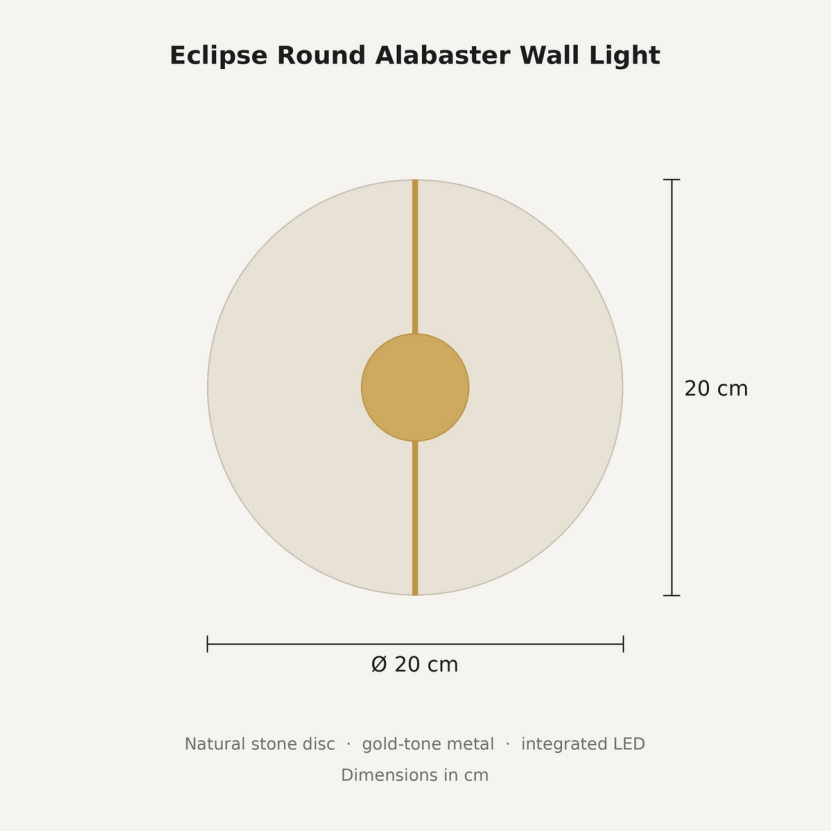
Eclipse Round Alabaster Wall Light

Installation & care guide · Aussie Lights



Before you start

- This is a hardwired wall light. In Australia it must be installed by a licensed electrician.
- Turn off the power at the switchboard before installation, cleaning or maintenance.
- Check that the wall can safely hold the light. Use screws and wall plugs suited to your wall (plasterboard, brick or timber).
- Indoor use in dry areas only.
- The stone disc is natural and fragile: unpack the light on a soft surface and handle it with both hands.

In the box

- Round stone wall light with gold-tone metal centre and integrated LED
- Mounting bracket, screws and wall plugs

Installation steps

1. Unpack the light on a soft surface and check that nothing is missing or damaged before the electrician arrives.
2. Mark the height: the centre of the light is usually 160 to 180 cm from the floor in a hallway or living room, or about 120 to 150 cm beside a bed.
3. Fix the mounting bracket to the wall with the supplied screws, centred over the electrical outlet. Check that it is level.

4. Your electrician connects the light to the mains wiring (active, neutral and earth).
5. Fit the light onto the bracket and tighten the screws, then restore power and test the light. The LED is built in: no globe to fit.

Care

- Switch off and let the light cool, then dust with a soft dry cloth.
- Do not use water, solvents or abrasive cleaners on the stone or the metal finish.
- Natural stone varies: veining and colour differ from one light to the next. Contact us if you have any issue with the light.
