# Elsie Schoolhouse Milk Glass Pendant Light

Installation Guide

### In the box

1 x milk glass shade on brass-finish holder with switch · 1 x ceiling canopy (12 cm) with mounting bracket · twisted fabric cord (up to 200 cm) · fixing hardware

### You will need

Drill, screwdriver, pencil and stepladder. One ES (E27) globe, max. 60 W, sold separately (warm white LED, 2700 to 3000K, recommended). Hang the shade about 75 cm above a table or bench (70 to 80 cm over an island).

### Important safety information

- This light must be installed by a licensed electrician, in line with AS/NZS 3000 (Wiring Rules) and local regulations.
- Turn the power off at the switchboard before installing, cleaning or servicing the light.
- Use screws and wall plugs suited to your wall (plasterboard, timber or masonry).
- The on/off switch on the socket is handy as a bedside light; leave the wall switch on to use it.
- Glass is fragile: unpack and handle the shade with care.

## Step by step

1. **Fix the mounting bracket**
   Separate the canopy from its bracket. Mark the holes and fix the bracket firmly to the ceiling, into a joist or with suitable plasterboard anchors.
2. **Set the drop**
   Adjust the fabric cord (up to 200 cm) to the drop you want and lock it in place. Your electrician can trim any extra cord.
3. **Connect the wiring**
   With the power OFF, connect the cord to the supply: Active to L, Neutral to N, and Earth to the earth terminal if one is fitted.
4. **Fit the canopy**
   Push the canopy up over the bracket, tuck the wires neatly inside and secure it so it sits flush with the ceiling.
5. **Fit the globe and shade**
   Screw an ES (E27) globe, no higher than 60 W, into the lampholder, then fit the glass shade to the holder securely by hand.
6. **Test**
   Restore the power at the switchboard and switch on the light.

### Care and cleaning

Turn the light off and let it cool. Wipe the glass with a soft, dry or slightly damp cloth. Never wet the lampholder or the cable, and avoid abrasive cleaners.
