Carra Marble Flush Ceiling Light

Installation & care guide · Aussie Lights

Before you start

- This is a hardwired ceiling light. In Australia it must be installed by a licensed electrician.
- Turn off the power at the switchboard before installation, cleaning, maintenance or changing the globe.
- Indoor use in dry areas only.
- The shade is natural marble: unpack it on a soft surface and handle it with care. Every piece has its own veining.

In the box

- Natural marble cylinder shade
- Dark metal ceiling base with E27 (ES) lampholder
- 4 W LED E27 globe
- Mounting bracket and screws

Installation steps

1. Check that nothing is missing or damaged before the electrician arrives.
2. Your electrician fixes the mounting bracket to the ceiling over the electrical point.
3. Your electrician connects the light to the mains wiring (active, neutral and earth).
4. Fit the metal base over the bracket and tighten the side screws.

5 Screw in the globe (E27, max 60 W, an LED globe is recommended), fit the marble shade, then restore power and test.

Care

- Switch off and let the light cool, then dust with a soft dry cloth.
- Do not use water, solvents or abrasive cleaners on the marble.
- Contact us if you have any issue with the light.
