Harper Crystal Drum Pendant Light

Installation Guide

In the box

1 x crystal drum shade (Ø 12 x 12 cm) with iron frame and lampholder · 85 cm adjustable cable · ceiling canopy (Ø 10 cm) with mounting bracket · fixing hardware

You will need

Drill, screwdriver, wire cutters, pencil and stepladder. One ES (E27) globe, max 40 W, sold separately (warm white LED, 2700 to 3000K, recommended).

Important safety information

- This light must be installed by a licensed electrician, in line with AS/NZS 3000 (Wiring Rules) and local regulations.
- Turn the power off at the switchboard before installing, cleaning or servicing the light.
- Use screws and wall plugs suited to your wall (plasterboard, timber or masonry).
- Fix the bracket to a ceiling joist or solid support, not to plasterboard alone.
- Handle the crystal prisms with clean, dry hands or soft gloves to avoid fingerprints.

Step by step

1. **Power off**
   Switch off the circuit at the switchboard before starting.
2. **Fix the bracket**
   Separate the canopy from its bracket. Mark the holes and screw the bracket firmly into a ceiling joist or a solid support.
3. **Set the drop**
   Adjust the cable to the height you want and cut any excess, leaving enough length to connect.
4. **Connect the wiring**
   Connect the light to the supply: Active to L, Neutral to N, and Earth to the earth terminal if one is fitted.
5. **Fit the canopy**
   Tuck the wires neatly inside, then fit the canopy over the bracket and secure it flush with the ceiling.
6. **Fit the globe and test**
   Screw an ES (E27) globe of 40 W or less into the lampholder inside the crystal drum, then restore the power and switch on.

Care and cleaning

Switch off and let the globe cool first. Wipe the frame and crystals with a soft, dry microfibre cloth and avoid abrasive or ammonia cleaners.
