Ember Orange Glass Mushroom Floor Lamp

Installation Guide

In the box

1 x orange gradient glass shade · black metal stem and round base with LED light · cable with foot switch and Australian plug

You will need

No tools usually needed. No globe to buy: the LED light comes with the lamp. A level floor near a power point.

Important safety information

- Indoor use only. Keep the lamp dry and away from water, heaters and open flames.
- Use a power point in good condition, and unplug the lamp before cleaning or moving it.
- Plug-in lamp: no electrician needed.
- Glass shade: handle it with care when assembling and moving the lamp.

Step by step

1. **Unpack**
   Unpack all parts on a soft surface and check nothing is missing. Keep the glass shade aside until last.
2. **Assemble the stand**
   Join the stem to the round base as shown in the box instructions and tighten firmly by hand so the lamp stands straight.
3. **Fit the shade**
   Carefully fit the glass shade to the top of the stem and secure it as shown, without over-tightening.
4. **Position the lamp**
   Stand the lamp on a level floor and keep the cable clear of walkways.
5. **Plug in and switch on**
   Plug into a power point and press the foot switch. See the box instructions to change between the three colour-temperature settings.

Care and cleaning

Switch off, unplug and let the lamp cool. Wipe the glass with a soft, dry or slightly damp cloth and dust the stand with a dry cloth. Never wet the switch, cable or plug.
