Cleo Semicircle Globe Wall Light

Installation Guide

In the box

Painted metal plate with G9 lampholder · opal globe shade · mounting plate · terminal block · fixings

You will need

Drill, screwdriver, pencil and spirit level. One G9 globe, sold separately (warm white LED recommended). Suggested height: about 120 to 140 cm beside a bed, 150 to 170 cm elsewhere.

Important safety information

- This light must be installed by a licensed electrician, in line with AS/NZS 3000 (Wiring Rules) and local regulations.
- Turn the power off at the switchboard before installing, cleaning or servicing the light.
- Use screws and wall plugs suited to your wall (plasterboard, timber or masonry).
- Indoor, dry areas only (IP20).
- Use an LED globe and do not exceed the maximum wattage shown on the lampholder.

Step by step

1. **Choose the orientation**
   Decide which way the curve will face, then undo the two side screws to take the mounting plate off the back.
2. **Fix the mounting plate**
   Check it is level, mark the holes, drill and screw the plate firmly to the wall, with the supply cable through the centre.
3. **Connect the wiring**
   With the power OFF, connect the supply through the terminal block: Active to L, Neutral to N, and Earth to the earth terminal if fitted.
4. **Fit the light**
   Place the light over the mounting plate in your chosen orientation and refit the two side screws until it sits firmly against the wall.
5. **Fit the globe and shade**
   Push a G9 globe into the lampholder without force, then twist the opal shade gently into place by hand.
6. **Test**
   Restore the power at the switchboard and switch on the light.

Care and cleaning

Turn the light off and let it cool. Dust the plate and shade with a soft, dry cloth. Do not use solvents or abrasive cleaners.
