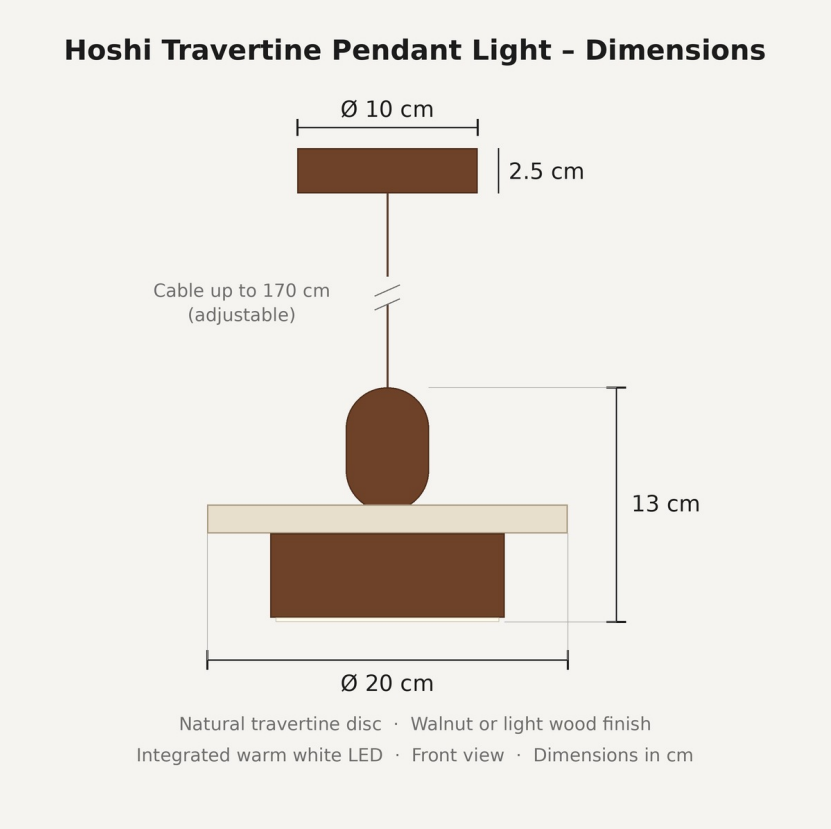
# Hoshi Travertine Pendant Light

Installation & care guide · Aussie Lights



## Before you start

- This is a hardwired pendant light. In Australia it must be installed by a licensed electrician.
- Turn off the power at the switchboard before installation, cleaning or maintenance.
- Check that the ceiling can safely hold the light, and use fixings suited to your ceiling.
- Indoor use in dry areas only.
- Unpack the travertine disc on a soft surface and handle it with care: natural stone can chip if knocked.

## In the box

- Pendant with travertine disc, wood-finish body, integrated LED and adjustable cable
- Ceiling base (canopy), mounting bracket and screws

## Installation steps

1. Check that nothing is missing or damaged before the electrician arrives.
2. Decide the hanging height: 50 to 70 cm above a bedside table, 75 to 90 cm above a kitchen bench or dining table, and at least 210 cm clear under the shade in a walkway.
3. Your electrician fixes the mounting bracket to the ceiling over the electrical point.
4. Your electrician connects the pendant to the mains wiring (active, neutral and earth).

5 Set the cable to the chosen height (up to 170 cm), fit the ceiling base over the bracket, then restore power and test the light.

## Care

- Switch off and let the light cool, then dust with a soft dry cloth.
- Do not use water, solvents or abrasive cleaners on the stone or the wood finish.
- The LED is integrated and is not replaceable like a globe.
- Contact us if you have any issue with the light.
