Folia Wooden Leaf Pendant Light

Installation Guide

In the box

1 x wooden leaf shade with brass lampholder · 1 x Ø10 cm canopy with bracket · 150 cm adjustable cable · fixings

You will need

Drill, screwdriver, pencil and stepladder. One ES (E27) globe, max. 40 W, sold separately (warm white LED, 2700 to 3000K, recommended).

Important safety information

- This light must be installed by a licensed electrician, in line with AS/NZS 3000 (Wiring Rules) and local regulations.
- Turn the power off at the switchboard before installing, cleaning or servicing the light.
- Use screws and wall plugs suited to your wall (plasterboard, timber or masonry).
- Natural wood: grain and tone vary slightly. Suits sloped ceilings up to 30°.

Step by step

1. **Fix the mounting bracket**
   Undo the two side screws to separate the canopy from its plate. Mark and drill the holes, insert the wall plugs and screw the plate firmly to the ceiling.
2. **Set the drop**
   Adjust the cable at the canopy to the drop you want (up to 150 cm) and lock it in place. Your electrician can trim any extra cable.
3. **Connect the wiring**
   With the power OFF, connect the cord to the supply with the connectors supplied: Active to L, Neutral to N, and Earth to the earth terminal if one is fitted.
4. **Fit the canopy**
   Tuck the wires inside, push the canopy up over the plate and refit the two side screws until it sits flush with the ceiling.
5. **Fit the globe**
   Screw an ES (E27) LED globe, max. 40 W, into the brass lampholder, gently and without force.
6. **Test**
   Restore the power at the switchboard and switch on the light.

Care and cleaning

Turn the light off and let it cool. Dust the shade with a soft dry cloth. Do not use water or cleaning products on the wood.
