Elio Linear LED Pendant Light

Installation Guide

In the box

1 x 100 cm LED bar with integrated 26 W LED · ceiling canopy with mounting bracket · 2 x suspension wires · fixing hardware

You will need

Drill, screwdriver, pencil and stepladder. A helper to hold the bar. No globe needed: the LED is built in. Hang it centred over the island or table, about 75 to 90 cm above the benchtop.

Important safety information

- This light must be installed by a licensed electrician, in line with AS/NZS 3000 (Wiring Rules) and local regulations.
- Turn the power off at the switchboard before installing, cleaning or servicing the light.
- Use screws and wall plugs suited to your wall (plasterboard, timber or masonry).
- 3-Colour version: change between warm, neutral and cool white with your wall switch.
- For a bench longer than about 200 cm, hang two bars in a row.

Step by step

1. **Fix the mounting bracket**
   Separate the canopy from its bracket. Mark the holes and fix the bracket firmly to the ceiling, into a joist or with suitable plasterboard anchors.
2. **Set the drop**
   Adjust both suspension wires (drop up to 150 cm) to the same length so the bar hangs level, then lock them in place.
3. **Connect the wiring**
   With the power OFF, connect the pendant cable to the supply: Active to L, Neutral to N, and Earth to the earth terminal if one is fitted.
4. **Fit the canopy**
   Push the canopy up over the bracket, tuck the wires neatly inside and secure it so it sits flush with the ceiling.
5. **Level the bar**
   Check the bar is level and centred over the bench. Fine-tune the wires if needed.
6. **Test**
   Restore the power at the switchboard and switch on the light.

Care and cleaning

Turn the light off. Wipe the bar and diffuser with a soft, dry cloth. Do not use water, solvents or abrasive cleaners.
