Ezra Industrial 3-Light Ceiling Light

Installation Guide

In the box

1 x black metal ceiling plate (Ø18 cm) with 3 fixed rods and 3 lampholders · mounting bracket · fixing hardware

You will need

Drill, screwdriver, pencil and stepladder. Three ES (E27) globes, sold separately (warm white LED, 2700 to 3000K, recommended).

Important safety information

- This light must be installed by a licensed electrician, in line with AS/NZS 3000 (Wiring Rules) and local regulations.
- Turn the power off at the switchboard before installing, cleaning or servicing the light.
- Use screws and wall plugs suited to your wall (plasterboard, timber or masonry).
- Not dimmable: use a standard on/off switch.
- The three rods are fixed at different lengths by design. Do not bend or force them.

Step by step

1. **Fix the bracket**
   Separate the ceiling plate from its bracket. Mark the holes and fix the bracket firmly to the ceiling, into a joist or with suitable plasterboard anchors.
2. **Connect the wiring**
   With the power OFF, connect the light to the supply: Active to L, Neutral to N, and Earth to the earth terminal if one is fitted.
3. **Fit the ceiling plate**
   Tuck the wires neatly inside, then fit the black plate over the bracket and secure it flush with the ceiling.
4. **Fit the globes**
   Screw one ES (E27) globe into each of the three lampholders, gently and without force.
5. **Test**
   Restore the power at the switchboard and switch on the light.

Care and cleaning

Turn the light off and let the globes cool. Wipe the plate and rods with a soft, dry cloth. Never wet the lampholders or the wiring, and avoid abrasive cleaners.
