Nora Retro Ceramic Pendant Light

Installation Guide

In the box

1 x ceramic shade with lampholder · 1 x ceiling canopy with mounting bracket · textured hanging cord · fixings

You will need

Drill, screwdriver, pencil and stepladder. One ES (E27) globe, sold separately (warm white LED, 2700 to 3000K, recommended). Hang the shade about 75 cm above a table or bench (70 to 80 cm over an island).

Important safety information

- This light must be installed by a licensed electrician, in line with AS/NZS 3000 (Wiring Rules) and local regulations.
- Turn the power off at the switchboard before installing, cleaning or servicing the light.
- Use screws and wall plugs suited to your wall (plasterboard, timber or masonry).
- Ceramic is fragile: unpack and handle the shade with care.
- To dim, use a dimmable LED globe with a compatible wall dimmer, fitted by your electrician.

Step by step

1. **Fix the mounting bracket**
   Separate the canopy from its bracket. Mark the holes and fix the bracket firmly to the ceiling, into a joist or with suitable plasterboard anchors.
2. **Set the drop**
   Loosen the cord grip under the canopy, slide the cord to the drop you want and tighten the grip again. Your electrician can trim any extra cord.
3. **Connect the wiring**
   With the power OFF, connect the cord to the supply: Active to L, Neutral to N, and Earth to the earth terminal if one is fitted.
4. **Fit the canopy**
   Push the canopy up over the bracket, tuck the wires neatly inside and secure it until it sits flush with the ceiling.
5. **Fit the globe**
   Screw an ES (E27) globe into the lampholder inside the shade, gently and without force.
6. **Test**
   Restore the power at the switchboard and switch on the light.

Care and cleaning

Turn the light off and let it cool. Dust the ceramic with a soft, dry cloth. A slightly damp cloth can be used on the outside glaze; never wet the lampholder or the cord.
