Halo Oval LED Pendant Light

Installation Guide

In the box

1 x oval LED frame with acrylic diffuser · 1 x ceiling canopy with mounting bracket · 120 cm adjustable steel suspension wires · 1 x remote control · fixings

You will need

Drill, screwdriver, pencil and stepladder. A helper to hold the frame. No globe needed: the LED is built in. Hang it about 75 cm above a table (70 to 80 cm over an island or bench).

Important safety information

- This light must be installed by a licensed electrician, in line with AS/NZS 3000 (Wiring Rules) and local regulations.
- Turn the power off at the switchboard before installing, cleaning or servicing the light.
- Use screws and wall plugs suited to your wall (plasterboard, timber or masonry).
- Dimming and warm-to-cool white are set with the remote.
- Centre the frame along the island or table for even light.

Step by step

1. **Fix the mounting bracket**
   Separate the canopy from its bracket. Mark the holes and fix the bracket firmly to the ceiling, into a joist or with suitable plasterboard anchors.
2. **Set the drop**
   Attach the suspension wires as shown in the box instructions and adjust them so the frame hangs level at the drop you want. Your electrician can trim extra wire and cable.
3. **Connect the wiring**
   With the power OFF, connect the cord to the supply: Active to L, Neutral to N, and Earth to the earth terminal if one is fitted.
4. **Fit the canopy**
   Push the canopy up over the bracket, tuck the wires neatly inside and secure it until it sits flush with the ceiling.
5. **Pair the remote**
   Fit the remote's battery if needed, then pair it as shown in the box instructions.
6. **Test**
   Restore the power at the switchboard and switch on the light.

Care and cleaning

Turn the light off and let it cool. Wipe the frame and diffuser with a soft, dry cloth. Do not use water, solvents or abrasive cleaners.
