Harlow Leather Belt LED Pendant Light

Installation Guide

In the box

1 x leather-look belt with integrated LED strip · 2 ceiling canopies (Ø10 cm) with mounting plates and clips · suspension cables · screws and wall plugs

You will need

Drill, screwdrivers, tape measure, stepladder and two people. Two ceiling points per belt: about 50 cm apart (Small), 80 cm (Medium) or 120 cm (Large).

Important safety information

- This light must be installed by a licensed electrician, in line with AS/NZS 3000 (Wiring Rules) and local regulations.
- Turn the power off at the switchboard before installing, cleaning or servicing the light.
- Use screws and wall plugs suited to your wall (plasterboard, timber or masonry).
- Integrated LED, no globe to buy. For indoor, dry areas.

Step by step

1. **Mark the two points**
   Measure and mark the two canopy positions on the ceiling for your size. When layering several belts, plan all points first.
2. **Fix the plates**
   Drill and tap in the wall plugs (skip the plugs on timber), then screw both mounting plates to the ceiling, with the supply cable at the powered point.
3. **Hang the belt**
   Clip the suspension cables into both canopies and adjust them until the belt curves evenly into a U at the drop you want.
4. **Connect the wiring**
   With the power OFF at the switchboard: Active to L, Neutral to N, Earth to the earth terminal if fitted. Check every connection is tight and insulated.
5. **Fit the canopies**
   Screw both canopies flush to their plates and trim any excess cable neatly.
6. **Test**
   Restore the power at the switchboard and switch on the light.

Care and cleaning

Turn the light off. Wipe the belt with a soft, slightly damp cloth and dry it straight away. No solvents or leather polish on the LED strip.
