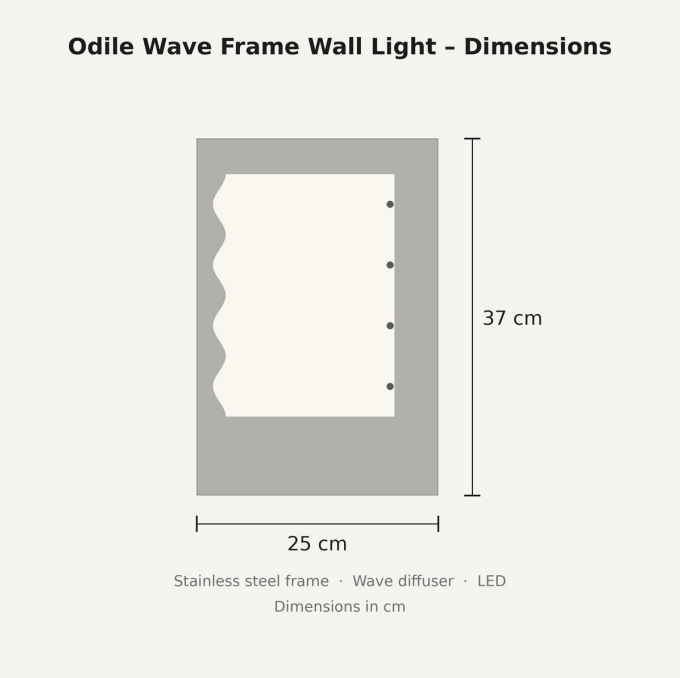
Odile Wave Frame Wall Light

Installation & care guide · Aussie Lights



H 37 x W 25 cm. Stainless steel frame with a white wave diffuser and LED light source (included). Warm white or 3-colour version, depending on the option you ordered.

Before you start

- This is a hardwired wall light. In Australia it must be installed by a licensed electrician.
- Turn off the power at the switchboard before installation, cleaning or maintenance.
- For indoor use only. Handle the diffuser with care and keep it away from water.

Installation steps

1. **Fix the bracket:** screw the mounting bracket to the wall over the electrical point, with the bracket centred where you want the light.
2. **Connect the wires:** your electrician connects the light to the mains wiring with the connector block (active, neutral and earth where fitted).
3. **Mount the light:** place the light body on the bracket and tighten the fixing screws so it sits flush against the wall.
4. **Test:** restore power and switch on. On the 3-colour version, follow the instructions supplied with the light to choose warm, neutral or cool white.

Care

- Switch off and let the light cool, then dust the diffuser with a soft dry cloth or a soft brush.
- Wipe the steel frame with a dry microfibre cloth. Do not use solvents or abrasive cleaners.
- Contact us if you have any issue with the light.
