Hestia Candle Warmer Lamp

Installation Guide

In the box

1 x Hestia candle warmer lamp (glass shade, brass-finish arm, timber base) with Australian plug and dimmer switch · 2 x GU10 bulbs · instruction manual

You will need

No tools and no electrician: Hestia is a plug-in lamp. You only need a jar candle (not included).

Important safety information

- This light must be installed by a licensed electrician, in line with AS/NZS 3000 (Wiring Rules) and local regulations.
- Turn the power off at the switchboard before installing, cleaning or servicing the light.
- Use screws and wall plugs suited to your wall (plasterboard, timber or masonry).
- The bulb and the glass shade get hot in use: let the lamp cool before you touch the shade or change the bulb.
- Use on a flat, stable, heat-safe surface, away from curtains and bedding. Indoor use only, away from water.
- Melted wax is hot: never move the lamp or the candle while the wax is liquid. Warm the candle for 1 to 2 hours at a time.
- Do not leave the lamp on unattended or while you sleep. Keep out of reach of children and pets.

Step by step

1. **Place the lamp**
   Stand the lamp on a flat, stable surface near a power point.
2. **Fit the bulb**
   Fit one GU10 bulb under the shade (push in and twist). To change it later, unplug the lamp and let it cool first. A spare bulb is included.
3. **Add your candle**
   Remove the lid and centre your jar candle on the timber base, under the shade. Do not light the wick.
4. **Set the height**
   Loosen the collar on the arm, slide the shade a few centimetres above the candle, then tighten the collar.
5. **Switch on and adjust**
   Plug in and turn the dimmer. The wax melts from the top after a few minutes and releases its scent, with no flame. Turn up for more scent and light, down for a gentle glow.
6. **Switch off**
   Turn the dimmer off and let the wax set before you move the candle.

Care and cleaning

Unplug and let it cool. Wipe the glass, arm and base with a soft dry cloth. After 5 or 6 uses the scent fades: carefully pour off the top layer of melted wax to bring it back.
