Pietra Alabaster Wall Light

Installation Guide

In the box

1 x light body with backplate · 1 x stone panel · 1 x mounting bracket · screws and wall plugs · wire connector

You will need

Drill, screwdriver, pencil and spirit level. Two G4 240 V globes (warm white LED, 2700 to 3000K, recommended). Suggested height: centre about 120 to 140 cm from the floor beside a bed, 150 to 170 cm in a living room or hallway.

Important safety information

- This light must be installed by a licensed electrician, in line with AS/NZS 3000 (Wiring Rules) and local regulations.
- Turn the power off at the switchboard before installing, cleaning or servicing the light.
- Use screws and wall plugs suited to your wall (plasterboard, timber or masonry).
- Use G4 240 V globes only. Do not fit 12 V G4 globes.
- Natural stone is fragile: handle the panel with care and never over-tighten the screws.

Step by step

1. **Remove the bracket**
   Undo the two caps on the front of the backplate and lift the light body off the mounting bracket. Keep the caps and screws.
2. **Fix the bracket to the wall**
   Hold the bracket in place, check it is level and mark the holes. Drill, insert the wall plugs and screw the bracket firmly to the wall, with the supply cable coming through the centre.
3. **Connect the wiring**
   With the power OFF, connect the light to the supply using the connector supplied: Active to L, Neutral to N, and Earth to the earth terminal if one is fitted. Tuck the wires neatly behind the backplate.
4. **Fit the light body**
   Place the backplate over the bracket and secure it with the two caps. Tighten them by hand until firm.
5. **Fit the globes**
   Push one G4 240 V globe into each holder, one above and one below the arm.
6. **Fit the stone panel**
   Slide the stone panel into the frame, centre it, then tighten the screws on both sides evenly until the panel is held firmly. Do not over-tighten.
7. **Test**
   Restore the power at the switchboard and switch on the light.

Care and cleaning

Turn the light off and let it cool. Dust the stone and frame with a soft, dry cloth. Do not use water, chemical solvents or abrasive cleaners on the stone.
