Hudson Black Cage 3-Light Pendant Light

Installation Guide

In the box

1 x 50 cm black ceiling bar with mounting bracket · 3 x black wire cages with lampholders on 100 cm cords · screws and wall plugs

You will need

Drill, screwdriver, pencil, spirit level and stepladder. Three ES (E27) globes, sold separately (warm white LED, 2700 to 3000K, recommended; filament-style globes suit the open cages). Hang the cages about 75 cm above a table or bench (70 to 80 cm over an island).

Important safety information

- This light must be installed by a licensed electrician, in line with AS/NZS 3000 (Wiring Rules) and local regulations.
- Turn the power off at the switchboard before installing, cleaning or servicing the light.
- Use screws and wall plugs suited to your wall (plasterboard, timber or masonry).
- Centre the ceiling bar over the table or island and check it is level before drilling.
- Use LED globes and do not exceed the maximum wattage shown on the lampholders.

Step by step

1. **Fix the mounting bracket**
   Mark the holes, check they are level, and fix the bracket firmly to the ceiling, into a joist or with suitable plasterboard anchors.
2. **Set the drop**
   Adjust each of the three cords to the drop you want, up to 100 cm, all level or staggered. Your electrician can trim any extra cord.
3. **Connect the wiring**
   With the power OFF, connect the cords to the supply: Active to L, Neutral to N, and Earth to the earth terminal if one is fitted.
4. **Fit the ceiling bar**
   Fit the bar to the bracket, tuck the wires neatly inside and tighten the screws until it sits flush with the ceiling.
5. **Fit the globes**
   Screw an ES (E27) globe into each lampholder through the cage, gently and without force.
6. **Test**
   Restore the power at the switchboard and switch on the light.

Care and cleaning

Turn the light off and let the globes cool. Dust the cages and ceiling bar with a soft, dry cloth. Never wet the lampholders or the cords.
