Sienna Cognac Glass Pendant Light

Installation Guide

In the box

1 x cognac glass shade · brass-finish stem with lampholder · ceiling canopy with bracket · 150 cm cable · screws and wall plugs

You will need

Drill, screwdriver, pencil and stepladder. One ES (E27) globe, sold separately (warm white LED, 2700 to 3000K, recommended). Hang the shade about 75 cm above a table or bench (70 to 80 cm over an island).

Important safety information

- This light must be installed by a licensed electrician, in line with AS/NZS 3000 (Wiring Rules) and local regulations.
- Turn the power off at the switchboard before installing, cleaning or servicing the light.
- Use screws and wall plugs suited to your wall (plasterboard, timber or masonry).
- Glass is fragile: unpack and handle the shade with care.
- Use an LED globe and do not exceed the maximum wattage shown on the lampholder.

Step by step

1. **Fix the mounting bracket**
   Separate the canopy from its bracket. Mark the holes and fix the bracket firmly to the ceiling, into a joist or with suitable plasterboard anchors.
2. **Set the drop**
   Loosen the cable grip at the canopy, set the drop you want, up to 150 cm, and tighten the grip. Your electrician can trim any extra cable.
3. **Connect the wiring**
   With the power OFF, connect the cable to the supply: Active to L, Neutral to N, and Earth to the earth terminal if one is fitted.
4. **Fit the canopy**
   Push the canopy up over the bracket, tuck the wires neatly inside and tighten the screws until it sits flush with the ceiling.
5. **Fit the globe**
   Screw in an ES (E27) globe, then fit the glass shade if packed separately, gently by hand.
6. **Test**
   Restore the power at the switchboard and switch on the light.

Care and cleaning

Turn the light off and let it cool. Clean the glass and stem with a soft cloth and a little mild glass cleaner. Never wet the lampholder or the cable.
