Kana Pleated Ceramic Pendant Light

Installation & care guide · Aussie Lights

Before you start

- This is a hardwired ceiling light. In Australia it must be installed by a licensed electrician.
- Turn off the power at the switchboard before installation, cleaning or maintenance.
- Check that the ceiling and fixing point can safely hold the weight of the light. Use the screws and wall plugs suited to your ceiling.
- Do not install on an unfinished or wet ceiling. Indoor use only.
- The ceramic shade is fragile: unpack it on a soft surface and handle it with both hands.

In the box

- Brass lamp holder with key switch and 150 cm twisted fabric cable
- Pleated white ceramic shade
- Ceiling canopy with mounting plate, screws and wall plugs

Installation steps

1. Unpack every part on a soft surface and check that nothing is missing or damaged before the electrician arrives.
2. Fix the mounting plate to the ceiling with the supplied screws, centred over the electrical outlet.
3. Your electrician connects the cable to the mains wiring (active, neutral and earth) inside the canopy.

4. Set the drop: slide the cable through the canopy grip to the length you want (up to 150 cm), then tighten.
5. Attach the canopy over the mounting plate.
6. Fit the ceramic shade on the lamp holder and tighten the shade ring by hand, without forcing.
7. Screw in an ES (E27) LED globe (sold separately), restore power and test the light.

Recommended heights

- Above a dining table or kitchen island: bottom of the shade about 75 to 85 cm above the table top.
- In a living room, bedroom or hallway: leave at least 210 cm between the floor and the bottom of the shade.

Care

- Switch off and let the light cool, then dust with a soft dry cloth.
- Wipe the ceramic shade with a soft damp cloth, then dry it. Do not use solvents or abrasive cleaners on the brass finish.
- Replace the globe with an LED globe of the same fitting. Contact us if you have any issue with the light.
