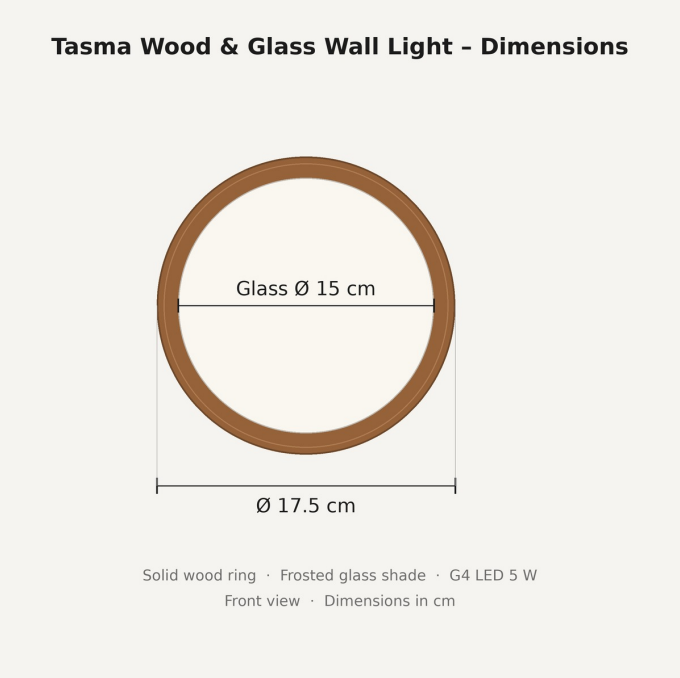
Tasma Wood & Glass Wall Light

Installation & care guide · Aussie Lights



Ø 17.5 cm solid wood ring with a Ø 15 cm frosted glass shade. G4 LED globe 5 W included. Warm white or 3-colour version, depending on the option you ordered.

Before you start

- This is a hardwired wall light. In Australia it must be installed by a licensed electrician.
- Turn off the power at the switchboard before installation, cleaning or maintenance.
- For indoor, dry areas only. Handle the glass shade with care.

Installation steps

1. **Fix the bracket:** screw the mounting bracket to the wall over the electrical point, with the bracket centred where you want the light.
2. **Connect the wires:** your electrician connects the light to the mains wiring with the connector block (active, neutral and earth where fitted).
3. **Mount the light:** place the wood base on the bracket and tighten the fixing screws so it sits flush against the wall.
4. **Fit the globe and glass:** insert the G4 LED globe, then fit the glass shade carefully onto the wood base.
5. **Test:** restore power and switch on. On the 3-colour version, follow the instructions supplied with the light to choose warm, neutral or cool white.

Care

- Switch off and let the light cool, then dust the glass with a soft dry cloth.
- Wipe the wood ring with a dry microfibre cloth. Do not use water, solvents or abrasive cleaners on the wood.

- Contact us if you have any issue with the light.
