Kelso Travertine Spotlight Bar

Installation & care guide · Aussie Lights

Before you start

- This is a hardwired ceiling or wall light. In Australia it must be installed by a licensed electrician.
- Turn off the power at the switchboard before installation, cleaning or maintenance.
- Check that the ceiling can safely hold the light, and use fixings suited to your ceiling.
- Indoor use in dry areas only.
- Travertine is a natural stone: each spot has its own pores and colour variations. Unpack it on a soft surface and handle it with care.

In the box

- Solid wood bar (60 cm with 3 spots, or 80 cm with 4 spots) with travertine spots on brass swivel joints
- Mounting bracket and screws. Globes (E27) are sold separately.

Installation steps

1. Check that nothing is missing or damaged before the electrician arrives.
2. Choose the position: centred over a kitchen bench, island, dining table or along a hallway. Kelso can also be fixed to a wall.
3. Your electrician fixes the mounting bracket to the ceiling or wall over the electrical point.
4. Your electrician connects the light to the mains wiring (active, neutral and earth).
5. Fix the wood bar onto the bracket, fit an E27 globe in each spot, restore power, then turn and tilt each spot to aim the light.

Care

- Switch off and let the light cool, then dust with a soft dry cloth.
- Do not use water, solvents or abrasive cleaners.
- Contact us if you have any issue with the light.
