Orbit Sculptural Globe Table Lamp

Installation Guide

In the box

1 x resin base with G9 lampholder · 1 x frosted glass globe shade · power cable

You will need

A stable, flat surface near a power point. A G9 globe: check the box, and if none is supplied use a G9 LED globe (warm white, 2700 to 3000K, recommended).

Important safety information

- Indoor use only. Keep the lamp dry and away from water, heaters and open flames.
- Use a power point in good condition, and unplug the lamp before cleaning or moving it, or changing the globe.
- Plug-in lamp: no electrician needed.
- Glass is fragile: handle the globe shade with care. Indoor use only.

Step by step

1. **Unpack**
   Unpack the base and glass shade carefully and check all parts. Keep the packaging until the lamp is working.
2. **Fit the globe**
   With the lamp unplugged, push a G9 globe straight into the lampholder, gently and without force.
3. **Fit the glass shade**
   Place the frosted glass globe on the base and check it sits securely.
4. **Place the lamp**
   Stand the lamp on a stable, flat surface, away from the edge, water and heat.
5. **Plug in**
   Plug the lamp into a power point, keeping the cable clear of walkways.
6. **Switch on**
   Switch on at the power point and at the lamp's switch, if fitted.

Care and cleaning

Unplug the lamp and let it cool. Dust the resin base and glass with a soft, dry cloth. Do not use water, solvents or abrasive cleaners.
