Luna Travertine Disc Pendant Light

Installation Guide

In the box

1 x pendant with travertine disc, wood dome and opal glass · ceiling canopy with bracket · adjustable cable (200 cm) · fixing hardware

You will need

Drill, screwdriver, pencil and stepladder. One G9 globe, max. 60 W, sold separately (warm white LED, 2700 to 3000K, recommended). Hang the shade about 75 cm above a table or bench (70 to 80 cm over an island).

Important safety information

- This light must be installed by a licensed electrician, in line with AS/NZS 3000 (Wiring Rules) and local regulations.
- Turn the power off at the switchboard before installing, cleaning or servicing the light.
- Use screws and wall plugs suited to your wall (plasterboard, timber or masonry).
- Natural travertine and opal glass are fragile: handle the disc and globe with care.

Step by step

1. **Fix the mounting bracket**
   Separate the canopy from its bracket. Mark the holes and fix the bracket firmly to the ceiling, into a joist or with suitable plasterboard anchors.
2. **Set the drop**
   Adjust the cable (200 cm) to the drop you want and lock it. Your electrician can trim any extra.
3. **Connect the wiring**
   With the power OFF, connect the pendant cable to the supply: Active to L, Neutral to N, and Earth to the earth terminal if one is fitted.
4. **Fit the canopy**
   Push the canopy up over the bracket, tuck the wires neatly inside and secure it so it sits flush with the ceiling.
5. **Fit the globe**
   Carefully remove the opal glass globe, push a G9 globe (max. 60 W) into the holder and refit the glass securely by hand.
6. **Test**
   Restore the power at the switchboard and switch on the light.

Care and cleaning

Turn the light off and let it cool. Dust the stone, wood and glass with a soft, dry cloth. Do not use water, solvents or abrasive cleaners on the stone.
