Lyra Sculptural Shell LED Pendant Light

Installation Guide

In the box

1 x shell shade with integrated LED · 1 x ceiling canopy with mounting bracket · 200 cm adjustable suspension wires · remote control · screws and wall plugs

You will need

Drill, screwdriver, pencil, stepladder and a helper. No globe needed: the LED is built in. Hang about 75 cm above a dining table (70 to 80 cm over an island), or higher in an entry or void.

Important safety information

- This light must be installed by a licensed electrician, in line with AS/NZS 3000 (Wiring Rules) and local regulations.
- Turn the power off at the switchboard before installing, cleaning or servicing the light.
- Use screws and wall plugs suited to your wall (plasterboard, timber or masonry).
- Once the power is on, use the remote to dim the light and change its colour.
- The natural strips are delicate: handle the shade gently and support it while wiring.

Step by step

1. **Fix the mounting bracket**
   Separate the canopy from its bracket. Mark the holes and fix the bracket firmly to the ceiling, into a joist or with suitable plasterboard anchors.
2. **Set the drop**
   Adjust the suspension wires at the canopy to the drop you want, keeping the shade level. Your electrician can trim any extra wire or cable.
3. **Connect the wiring**
   With a helper supporting the shade and the power OFF, connect the cable to the supply: Active to L, Neutral to N, and Earth to the earth terminal if one is fitted.
4. **Fit the canopy**
   Push the canopy up over the bracket, tuck the wires neatly inside and tighten the screws until it sits flush with the ceiling.
5. **Test**
   Restore the power at the switchboard and switch on the light.

Care and cleaning

Turn the light off. Dust the strips gently with a soft, dry brush. Do not use water, solvents or cleaning sprays.
