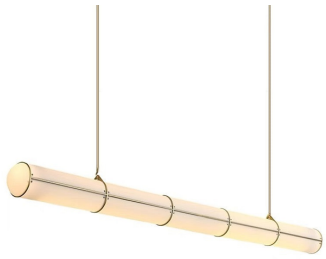
Otis Linear Tube LED Pendant Light

Installation Guide



In the box

1 x LED opal tube (120 or 150 cm) · 2 x ceiling canopies with brackets · rod sections 50, 30 and 20 cm · fixings

You will need

Drill, screwdriver, tape measure, spirit level, stepladder and a helper. LED built in, not dimmable. Hang 75 to 85 cm above the surface.

Important safety information

- This light must be installed by a licensed electrician, in line with AS/NZS 3000 (Wiring Rules) and local regulations.
- Turn the power off at the switchboard before installing, cleaning or servicing the light.
- Use screws and wall plugs suited to your wall (plasterboard, timber or masonry).

Step by step

1. **Mark the ceiling**
   Measure the spacing of the two hanging points on the tube and mark it on the ceiling, centred over the island or table.
2. **Fix the brackets**
   Drill at the marks, fit wall plugs or fix into joists, and screw both brackets firmly in place.
3. **Set the drop**
   Join the rod sections (50, 30, 20 cm) to the height you want. Make both sides the same length.
4. **Connect the wiring**
   With the power OFF: Active to L, Neutral to N, Earth to the earth terminal. Tuck the wires inside.
5. **Hang the light**
   With a helper holding the tube, attach the rods, push the canopies over the brackets and check it is level.
6. **Test**
   Restore the power and switch on. Switch off and on at the wall to change warm, natural or cool white.

Care and cleaning

Turn the light off and let it cool. Dust the tube and rings with a soft, dry cloth. Do not use water, solvents or abrasive cleaners.
