Reed Gold LED Tube Pendant Light

Installation Guide

In the box

LED tube with integrated LED (Single: 1 x 50 cm; Double: 2 x 44 cm) · ceiling canopy with mounting bracket (Double: one shared 12 cm canopy) · suspension cable(s) · fixing hardware

You will need

Drill, screwdriver, pencil and stepladder. No globe needed: the LED is built in. Suggested: hang the tube about 75 cm above a table or bench, or level with your shoulder beside a bed.

Important safety information

- This light must be installed by a licensed electrician, in line with AS/NZS 3000 (Wiring Rules) and local regulations.
- Turn the power off at the switchboard before installing, cleaning or servicing the light.
- Use screws and wall plugs suited to your wall (plasterboard, timber or masonry).
- Double: both tubes hang from one shared canopy, so only one ceiling point is needed.

Step by step

1. **Fix the mounting bracket**
   Separate the canopy from its bracket. Mark the holes and fix the bracket firmly to the ceiling, into a joist or with suitable plasterboard anchors.
2. **Set the drop**
   Adjust the cable to the drop you want (Single up to 200 cm; Double up to 100 cm per tube) and lock it in place. Your electrician can trim any extra cable.
3. **Connect the wiring**
   With the power OFF, connect the pendant cable(s) to the supply: Active to L, Neutral to N, and Earth to the earth terminal if one is fitted.
4. **Fit the canopy**
   Push the canopy up over the bracket, tuck the wires neatly inside and secure it so it sits flush with the ceiling.
5. **Check the tube(s)**
   Make sure each tube hangs straight and level. For the Double, set both cables to the same or staggered heights as you prefer.
6. **Test**
   Restore the power at the switchboard and switch on the light.

Care and cleaning

Turn the light off. Clean with a soft, dry cloth. Do not use water, solvents or abrasive cleaners on the gold-tone finish or acrylic tube.
