Rhea Oval Glass Pendant Light

Installation Guide

In the box

1 x oval glass shade (Ø 28 x 15 cm) · lampholder with 120 cm adjustable cable · black ceiling canopy (Ø 12 cm) with mounting bracket · fixing hardware

You will need

Drill, screwdriver, wire cutters, pencil and stepladder. One ES (E27) globe, max 60 W, sold separately (warm white LED, 2700 to 3000K, recommended).

Important safety information

- This light must be installed by a licensed electrician, in line with AS/NZS 3000 (Wiring Rules) and local regulations.
- Turn the power off at the switchboard before installing, cleaning or servicing the light.
- Use screws and wall plugs suited to your wall (plasterboard, timber or masonry).
- Fix the bracket to a ceiling joist or solid support, not to plasterboard alone.
- Handle the glass shade with care and keep it in its packaging until you are ready to fit it.

Step by step

1. **Power off**
   Switch off the circuit at the switchboard before starting.
2. **Fix the bracket**
   Separate the canopy from its bracket. Mark the holes and screw the bracket firmly into a ceiling joist or a solid support.
3. **Set the drop**
   Adjust the cable to the height you want and cut any excess, leaving enough length to connect.
4. **Connect the wiring**
   Connect the light to the supply: Active to L, Neutral to N, and Earth to the earth terminal if one is fitted.
5. **Fit the canopy**
   Tuck the wires neatly inside, then fit the canopy over the bracket and secure it flush with the ceiling.
6. **Fit the globe and test**
   Screw an ES (E27) globe of 60 W or less into the lampholder inside the glass shade, then restore the power and switch on.

Care and cleaning

Switch off and let the globe cool first. Wipe the glass with a soft, slightly damp cloth, then dry it. Avoid abrasive or harsh cleaners.
