Momo Opal Globe Wall Light

Installation & care guide · Aussie Lights

Before you start

- This is a hardwired wall light. In Australia it must be installed by a licensed electrician.
- Turn off the power at the switchboard before installation, cleaning or maintenance.
- Check that the wall can safely hold the light. Use the screws and wall plugs suited to your wall (plasterboard, brick or timber).
- Indoor use in dry areas only (IP20). In a bathroom, keep it outside the shower and bath zones.
- The opal glass globe is fragile: unpack it on a soft surface and handle it with care.

In the box

- Resin wall light base with G9 lamp holder
- Opal glass globe
- Mounting bracket, screws and wall plugs

Installation steps

1. Unpack every part on a soft surface and check that nothing is missing or damaged before the electrician arrives.
2. Mark the height: the centre of the light is usually 160 to 180 cm from the floor in a hallway or living room, or about 120 to 150 cm beside a bed.
3. Fix the mounting bracket to the wall with the supplied screws, centred over the electrical outlet.

4. Your electrician connects the light to the mains wiring (active, neutral and earth).
5. Fit the base over the bracket and tighten the side screws.
6. Fit a G9 LED globe into the lamp holder.
7. Fit the opal glass globe and tighten it by hand, without forcing. Restore power and test the light.

Care

- Switch off and let the light cool, then dust with a soft dry cloth.
- Wash the glass globe in lukewarm soapy water and dry it fully before refitting. Wipe the resin base with a soft damp cloth. Do not use solvents or abrasive cleaners.
- Use a G9 LED globe. Contact us if you have any issue with the light.
