Nell Fluted Wall Light

Installation Guide

In the box

1 x fluted resin wall light with integrated LED · 1 x mounting bracket · terminal block · 2 x side screws · screws and wall plugs

You will need

Drill, screwdriver, pencil and spirit level. No globe needed: the LED is built in. Suggested height: centre about 120 to 150 cm from the floor beside a bed, 150 to 170 cm in a living room or hallway.

Important safety information

- This light must be installed by a licensed electrician, in line with AS/NZS 3000 (Wiring Rules) and local regulations.
- Turn the power off at the switchboard before installing, cleaning or servicing the light.
- Use screws and wall plugs suited to your wall (plasterboard, timber or masonry).
- Indoor use in dry areas only.
- Resin finish: handle with care and avoid knocks.

Step by step

1. **Remove the mounting bracket**
   Undo the two small screws on the sides of the light and take the mounting bracket off the back. Keep the screws.
2. **Fix the bracket**
   Hold the bracket against the wall, check it is level and mark the holes. Check for hidden pipes or cables, drill, insert the wall plugs and screw the bracket firmly in place, with the supply cable through the centre.
3. **Connect the wiring**
   With the power OFF, connect the supply to the light through the terminal block: Active to L, Neutral to N, and Earth to the earth terminal if one is fitted. Tuck the wires neatly away.
4. **Fit the light**
   Push the light over the bracket until it sits flat against the wall, then refit the two side screws. Tighten by hand only, to avoid marking the resin.
5. **Test**
   Restore the power at the switchboard and switch on the light.

Care and cleaning

Turn the light off. Dust the resin with a soft, dry cloth or brush. Do not use water, solvents or abrasive cleaners.
