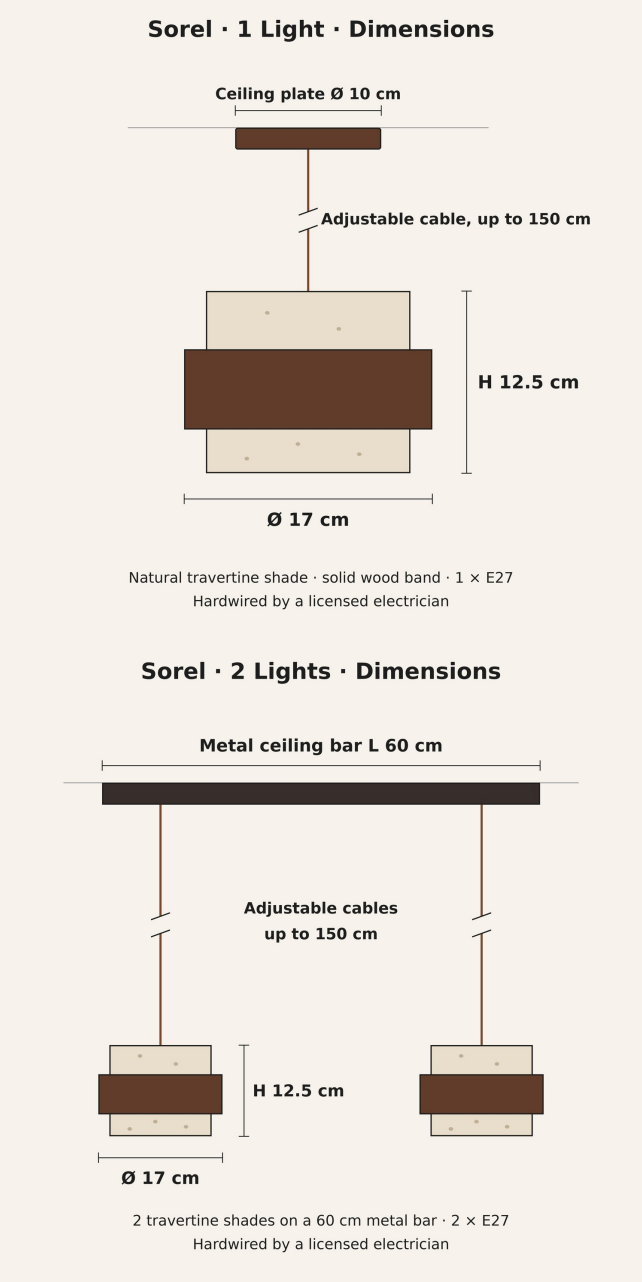
Sorel Travertine & Wood Pendant Light

Installation & care guide · Aussie Lights



Before you start

- This is a hardwired pendant light. In Australia it must be installed by a licensed electrician.
- Turn off the power at the switchboard before installation, cleaning or maintenance.
- Check that the ceiling can safely hold the light, and use fixings suited to your ceiling.
- Indoor use in dry areas only.
- Travertine is a natural stone: each shade has its own pores and colour variations. Unpack it on a soft surface and handle it with care.

In the box

- 1 Light: pendant with travertine shade, solid wood band and adjustable cable, round ceiling plate

- 2 Lights: two pendants on a 60 cm metal ceiling bar
- Mounting bracket and screws. Globes (E27) are sold separately.

Installation steps

1. Check that nothing is missing or damaged before the electrician arrives.
2. Decide the hanging height: 50 to 70 cm above a bedside table, 75 to 90 cm above a kitchen bench or dining table, and at least 210 cm clear under the shade in a walkway.
3. Your electrician fixes the mounting bracket to the ceiling over the electrical point.
4. Your electrician connects the pendant to the mains wiring (active, neutral and earth).
5. Set the cable to the chosen height (up to 150 cm). On the 2-light bar, each cable can be set to its own height, fit the ceiling base over the bracket, then restore power and test the light.

Care

- Switch off and let the light cool, then dust with a soft dry cloth.
- Do not use water, solvents or abrasive cleaners.
- Contact us if you have any issue with the light.
