Palma Rattan Petal Pendant Light

Installation Guide

In the box

Rattan petals in several sizes · iron frame with arms and lampholder · canopy with bracket · 100 cm cable · terminal block · fixings

You will need

Drill, screwdriver, pencil and stepladder. One ES (E27) globe, sold separately (warm white LED recommended). Hang the shade about 75 cm above a table or bench.

Important safety information

- This light must be installed by a licensed electrician, in line with AS/NZS 3000 (Wiring Rules) and local regulations.
- Turn the power off at the switchboard before installing, cleaning or servicing the light.
- Use screws and wall plugs suited to your wall (plasterboard, timber or masonry).
- Natural rattan: each piece varies slightly in tone and weave. Use an LED globe within the wattage shown on the lampholder.

Step by step

1. **Assemble the shade**
   Screw the arms into the hub. Sort the petals by size, hang them on the arms with sizes alternating evenly, then tighten the small end screws.
2. **Fix the mounting bracket**
   Separate the canopy from its bracket and fix the bracket firmly to the ceiling, into a joist or with suitable anchors.
3. **Connect the wiring**
   With the power OFF, connect the cable through the terminal block: Active to L, Neutral to N, and Earth to the earth terminal if fitted.
4. **Fit the canopy**
   Set the drop at the canopy (up to 100 cm) and lock it. Tuck the wires in, push the canopy over the bracket and fit the two side screws.
5. **Fit the globe**
   Check the ring holding the frame on the lampholder is tight, then screw an ES (E27) globe in through the petals.
6. **Test**
   Restore the power at the switchboard and switch on the light.

Care and cleaning

Turn the light off and let it cool. Dust the rattan with a soft brush or a vacuum on low with a brush head. Do not wet the shade.
