Skye Flat Disc LED Pendant Light

Installation & care guide · Aussie Lights

Before you start

- This is a hardwired ceiling light. In Australia it must be installed by a licensed electrician.
- Turn off the power at the switchboard before installation, cleaning or maintenance.
- Check that the ceiling and fixing point can safely hold the weight of the light. Use the screws and wall plugs suited to your ceiling.
- Do not install on an unfinished or wet ceiling. Indoor use only.
- Handle the disc by its metal edge and keep the acrylic diffuser free of fingerprints.

In the box

- Flat metal disc with integrated LED and acrylic diffuser
- Suspension cable, adjustable up to 120 cm
- Ceiling canopy with mounting plate, screws and wall plugs

Installation steps

1. Unpack every part on a soft surface and check that nothing is missing or damaged before the electrician arrives.
2. Fix the mounting plate to the ceiling with the supplied screws, centred over the electrical outlet.
3. Your electrician connects the cable to the mains wiring (active, neutral and earth) inside the canopy.

4. Set the drop: slide the cable through the canopy grip to the length you want (up to 120 cm), then tighten.
5. Attach the canopy over the mounting plate.
6. Restore power and test the light.

Recommended heights

- Above a dining table or kitchen island: disc about 75 to 85 cm above the table top.
- In a living room, bedroom or hallway: leave at least 210 cm between the floor and the disc.

Care

- Switch off and let the light cool, then dust with a soft dry cloth.
- Dust the disc with a soft dry cloth. Do not use water, solvents or abrasive cleaners.
- The LED is integrated and is not a replaceable globe. Contact us if you have any issue with the light.
