Tavi Square Travertine Flush Ceiling Light

Installation & care guide · Aussie Lights

Before you start

- This is a hardwired ceiling light. In Australia it must be installed by a licensed electrician.
- Turn off the power at the switchboard before installation, cleaning, maintenance or changing the globe.
- Indoor use in dry areas only.
- The body is natural travertine: unpack it on a soft surface and handle it with care. Every piece has its own pores and banding.

In the box

- Natural travertine square body
- Walnut or light wood ceiling base with E27 (ES) lampholder
- Mounting bracket and screws (globe sold separately)

Installation steps

1. Check that nothing is missing or damaged before the electrician arrives.
2. Your electrician fixes the mounting bracket to the ceiling over the electrical point.
3. Your electrician connects the light to the mains wiring (active, neutral and earth).
4. Fit the wood base and travertine body over the bracket and tighten the side screws.

5 Screw in an E27 globe (max 40 W, a warm white LED globe is recommended), then restore power and test.

Care

- Switch off and let the light cool, then dust with a soft dry cloth.
- Do not use water, solvents or abrasive cleaners on the stone.
- Contact us if you have any issue with the light.
