Vela LED Ring Chandelier

Installation Guide

In the box

LED rings (3, 4, 5 or 6, as ordered) · round ceiling canopy with mounting bracket · adjustable steel suspension wires · remote control (remote version only) · fixings

You will need

Two people, drill, screwdriver, pencil and a sturdy ladder. No globes needed: the LEDs are built in. Drop up to 150 cm (3 rings), 200 cm (4) or 300 cm (5 or 6).

Important safety information

- This light must be installed by a licensed electrician, in line with AS/NZS 3000 (Wiring Rules) and local regulations.
- Turn the power off at the switchboard before installing, cleaning or servicing the light.
- Use screws and wall plugs suited to your wall (plasterboard, timber or masonry).
- Fix it securely into a joist or a support able to carry its full weight, especially over voids and stairwells.
- Remote version: pair the remote as shown in the box instructions.

Step by step

1. **Fix the mounting bracket**
   Fix the canopy bracket securely to the ceiling, into a joist or a support able to carry the chandelier's weight.
2. **Connect the wiring**
   With the power OFF, connect the light to the supply: Active to L, Neutral to N, and Earth to the earth terminal if one is fitted.
3. **Fit the canopy**
   Push the canopy up over the bracket, tuck the wires neatly inside and secure it until it sits flush with the ceiling.
4. **Hang the rings**
   With two people, attach each ring to its suspension wires and connect it as shown in the box instructions.
5. **Set heights and angles**
   Adjust each ring's wires to set its height and angle. Your electrician can trim any extra wire.
6. **Test**
   Restore the power at the switchboard and switch on the light.

Care and cleaning

Turn the light off and let it cool. Wipe the rings with a soft, dry cloth. Do not use water, solvents or abrasive cleaners.
