Vera Marble Split Cylinder Pendant Light

Installation Guide

In the box

1 x marble-look split cylinder shade (H 30 x Ø 8 cm) with G9 lampholder · 1 x rod mount (about 30 cm) · 1 x ceiling canopy with bracket · fixing hardware

You will need

Drill, screwdriver, pencil, stepladder. One G9 globe, sold separately (warm white LED 2700-3000K suggested). Not dimmable.

Important safety information

- This light must be installed by a licensed electrician, in line with AS/NZS 3000 (Wiring Rules) and local regulations.
- Turn the power off at the switchboard before installing, cleaning or servicing the light.
- Use screws and wall plugs suited to your wall (plasterboard, timber or masonry).

Step by step

1. **Mark and drill**
   Hold the ceiling bracket in place and mark the holes with a pencil. Drill the holes and tap in plastic anchors, or fix into a joist.
2. **Fix the bracket**
   Line up the bracket with the anchors and tighten the screws so it sits firmly against the ceiling.
3. **Connect the wiring**
   With the power OFF, connect the pendant wires to the supply: Active to L, Neutral to N, and Earth to the earth terminal if one is fitted.
4. **Fit the canopy and rod**
   Tuck the wires neatly inside, push the canopy up over the bracket and secure it. Check the rod is tight and hangs straight.
5. **Fit the globe**
   Gently push a G9 globe into the lampholder inside the cylinder. Handle the shade with care: the stone-look finish can chip if knocked.
6. **Test**
   Restore the power at the switchboard and switch on. The light should glow evenly through the split.

Care and cleaning

Turn the light off and let it cool. Dust with a soft, dry cloth. Do not use water or cleaning sprays on the marble-look finish.
