Waratah Woven Petal Pendant Light

Installation Guide

In the box

1 x pendant body with woven petals (1 or 3 lights) · opal glass globe shade(s) · 1 x ceiling canopy with mounting bracket · 150 cm adjustable cable · fixings

You will need

Drill, screwdriver, pencil and stepladder. One ES (E27) globe per light, max. 40 W each (warm white LED, 2700 to 3000K, recommended).

Important safety information

- This light must be installed by a licensed electrician, in line with AS/NZS 3000 (Wiring Rules) and local regulations.
- Turn the power off at the switchboard before installing, cleaning or servicing the light.
- Use screws and wall plugs suited to your wall (plasterboard, timber or masonry).
- The petals are woven natural fibre: use LED globes of 40 W or less so the light stays cool.
- Suitable for sloped ceilings up to 30°.

Step by step

1. **Fix the mounting bracket**
   Undo the side screws to separate the canopy from its plate. Mark and drill the holes, insert the wall plugs and screw the plate firmly to the ceiling.
2. **Set the drop**
   Adjust the cable at the canopy to the drop you want (up to 150 cm) and lock it in place. Your electrician can trim any extra cable.
3. **Connect the wiring**
   With the power OFF, connect the cord to the supply with the connectors supplied: Active to L, Neutral to N, and Earth to the earth terminal.
4. **Fit the canopy**
   Tuck the wires inside, push the canopy up over the plate and refit the side screws until it sits flush with the ceiling.
5. **Fit the globes and glass**
   Screw an ES (E27) LED globe, max. 40 W, into each lampholder, then fit each opal glass shade and tighten it gently by hand.
6. **Arrange the petals and test**
   Adjust the petals so they sit evenly. Restore the power at the switchboard and switch on the light.

Care and cleaning

Turn the light off and let it cool. Dust the petals with a soft dry brush and wipe the glass with a soft dry cloth. Keep away from moisture.
