Wisp Floor-to-Ceiling LED Cable Floor Lamp

Installation Guide

In the box

1 x ceiling plate · cable with 1, 2 or 3 integrated LED cones · 1 x black marble base · lead with Australian 3-pin plug and on/off switch (plug-in version) · screws and wall plugs

You will need

Drill, screwdriver, pencil and stepladder to fix the ceiling plate. No globe needed: the LEDs are built in. Suits ceilings up to 350 cm.

Important safety information

- This light must be installed by a licensed electrician, in line with AS/NZS 3000 (Wiring Rules) and local regulations.
- Turn the power off at the switchboard before installing, cleaning or servicing the light.
- Use screws and wall plugs suited to your wall (plasterboard, timber or masonry).
- Plug-in version: no electrician needed. Hardwired version: wiring by a licensed electrician only.
- The marble base keeps the cable taut: lift it with care and keep the cable vertical.

Step by step

1. **Mark the position**
   Choose the spot, then mark the ceiling point directly above where the marble base will sit.
2. **Connect the wiring (hardwired)**
   Hardwired version only. With the power OFF, connect the ceiling plate to the supply: Active to L, Neutral to N, and Earth to the earth terminal if one is fitted.
3. **Fix the ceiling plate**
   Fix the plate firmly to the ceiling at the mark, into a joist or with suitable plasterboard anchors.
4. **Tension the cable**
   Adjust the cable length so the marble base rests on the floor and the cable runs straight and taut.
5. **Test**
   Plug-in version: plug into a power point and switch on at the lead. Hardwired version: restore the power at the switchboard and switch on the light.

Care and cleaning

Switch off (and unplug the plug-in version). Dust the cable, cones and marble with a soft, dry cloth. Do not use water or solvents on the marble.

Need help?

Email hello@aussielights.com with your order number and a photo. Your light is covered by our 2-year warranty and 30-day returns.
