Wren Wood & Opal Glass Lantern Table Lamp

Installation Guide

In the box

1 x table lamp with wooden frame and opal glass shade · power cable with Australian plug

You will need

A power point within reach. One ES (E27) globe, sold separately (warm white LED, 2700 to 3000K, recommended).

Important safety information

- Indoor use only. Keep the lamp dry and away from water, heaters and open flames.
- Use a power point in good condition, and unplug the lamp before cleaning or moving it, or changing the globe.
- Plug-in lamp: no electrician needed.
- Opal glass is fragile: handle the shade with care when fitting the globe.

Step by step

1. **Unpack**
   Remove all packaging and check the frame, glass shade and cable for any damage before use.
2. **Fit the globe**
   Carefully reach the lampholder inside the glass shade and screw in an ES (E27) globe, gently and without force. Refit the shade if you lifted it out.
3. **Place the lamp**
   Stand the lamp on a stable, level surface and keep the power cable clear of walkways.
4. **Plug in**
   Plug the Australian plug into a power point and switch the power point on.
5. **Switch on**
   Press the on/off button switch on the lamp.

Care and cleaning

Unplug the lamp before cleaning or moving it and let the globe cool. Dust the wooden frame with a soft, dry cloth and wipe the glass gently. Do not use water or solvents on the wood.
