Yuki Rice Paper Floor Lamp

Installation Guide

In the box

1 x rice paper floor lamp with integrated LED · USB cable · remote control

You will need

A USB phone charger in a power point, or a power bank (a wall adaptor is not included). No globe needed: the LED is built in.

Important safety information

- Indoor use only. Keep the lamp dry and away from heaters, candles and open flames.
- Use a USB adaptor or power bank in good condition, and unplug the lamp before cleaning or moving it.
- Plug-in lamp: no electrician and no wall fixing needed.
- Ambient light: it gives a soft glow to a corner and is not designed as a main room light.

Step by step

1. **Unpack**
   Remove all packaging carefully. The rice paper shade is delicate: hold the lamp by its frame, not by the paper.
2. **Open the shade**
   If the shade arrives folded, gently extend it to its full 107 cm height and make sure it sits straight on its wire feet.
3. **Place the lamp**
   Stand it on a flat, stable floor, away from heaters, open flames and water, with the cable clear of walkways.
4. **Connect the power**
   Plug the USB cable into the lamp and into a USB phone charger in a power point, or into a power bank.
5. **Use the remote**
   Turn the lamp on and off, change between warm, neutral and cool white, adjust the brightness and set the timer.

Care and cleaning

Unplug the lamp. Dust the paper very gently with a soft, dry brush or feather duster. Never use water or a damp cloth on the paper.
